I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that is not available in the rural part of the country that I live in. Additionally, I travel by car quite frequently and XM radio allows me to listen to programs in areas of the country where no radio signal can be received. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
